

DARPA Chemical & Biological Defense Technologies 2004

**Sponsored by the
Defense Advanced Research Projects Agency**

This conference will describe DARPA's technology investments in support of defense against biological and chemical weapons. Topics to be covered include:

- **Chemical and biological agent sensors**
- **Advanced filtration technologies**
- **Neutralization technologies**
- **Decontamination technologies**
- **Modeling capabilities**
- **Active defense systems**
(for battlefields and for buildings)
- **Medical diagnostics**
- **Medical therapeutics**

The conference will be unclassified. Attendance is limited to government personnel.

Registration opens 16 July 2004 via website
<https://dtsn.darpa.mil/chembioconference>.

Further conference details are also available at that site.
Space may be limited so please register early.

Please direct questions or comments to
chembioconference@darpa.mil.
